

## DIMENSIONS

(MODEL): WB-LYP10000AHA

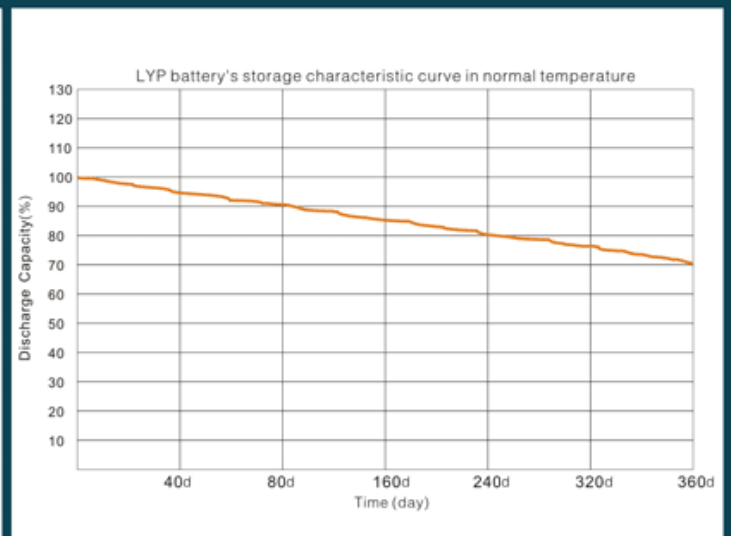

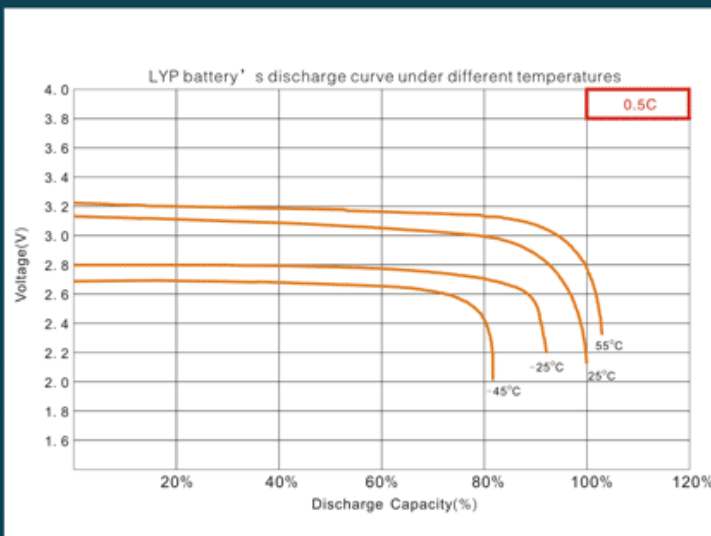

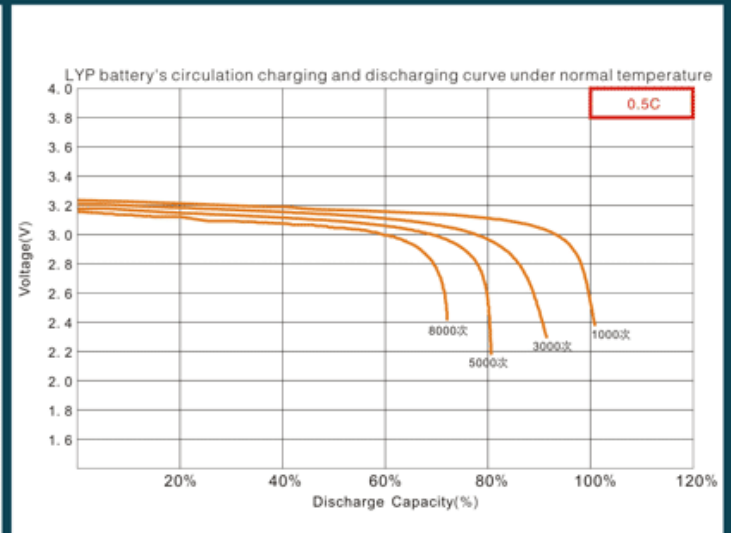

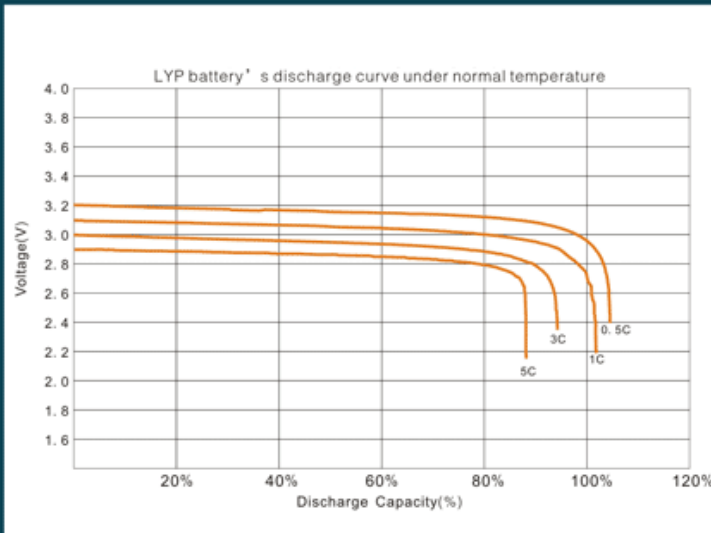

## SPECIFICATIONS

### (MODEL): WB-LYP10000AHA

|                                   |                      |                                 |
|-----------------------------------|----------------------|---------------------------------|
| Nominal Capacity                  | 10000Ah              |                                 |
| Operation Voltage                 | (Charge)             | 4.0V                            |
|                                   | (Discharge)          | 2.8V                            |
| Max Charge Current                | $\leq 1CA$           |                                 |
| Max Discharge Current             | (Constant Current)   | $\leq 1CA$                      |
|                                   | (Impulse Current)    | $\leq 20CA$                     |
| Standard Charge/Discharge Current | 0.5CA                |                                 |
| Cycle Life                        | (80DOD%)             | $\geq 5000$ Times               |
|                                   | (70DOD%)             | $\geq 7000$ Times               |
| Temperature Durability Of Case    | $\leq 200^{\circ}C$  |                                 |
| Operating Temperature             | (Charge)             | $-45^{\circ}C \sim 85^{\circ}C$ |
|                                   | (Discharge)          | $-45^{\circ}C \sim 85^{\circ}C$ |
| Self-discharge Rate               | $\leq 3\%$ (Monthly) |                                 |
| Weight                            | 335kg $\pm$ 3000g    |                                 |
